

Skyliner® Technical Bulletin 012: **Skyliner® Spray Adhesive Alternative**

Skyliner spray adhesive is a fast drying, long lasting high tack pressure sensitive adhesive. The spray adhesive comes in easy to use and carry aerosol cans. The spray adhesive is an alternative to the brush on adhesive normally supplied with a recommended workability temperature down to 40°F. In the event the aerosol can becomes frozen or produces poor or sputtering spray, it should be warmed up before continued use. The spray adhesive has been tested and complies with OSHA leading edge fall protection when used in conjunction with the Skyliner Safety Band, Safety Clips and manufacturer's instructions. The spray adhesive can be used in place of the liquid adhesive. Be sure to ask for it on your next order.
